	Live Release Rate	N/A	N/A	79.6%	79.6%	ASPCA Live Release Rate take all live releases and divide that number by all live intake (=M2/T). This does not account for animals that are still in care and the save rate will be low when the rescue is full.
	Save Rate	N/A	N/A	96.7%	96.7%	Save rate is normally reported as intake minus euthanasia divided by intake ($=((G2+A)-(P+Q))/(G2+A)$). This accounts for all animals that have been euthanized.
Note: To check your statistics and calculations - A plus G.2 should equal S.2 plus T						
Total Column for Rows A + G.2 =				181		
Total Column for Rows S.2 + T =				181
